SECTION 4. FIRST AID MEASURES

- Inhalation** : Move to fresh air. If breathing is irregular or stopped, administer artificial respiration. Use oxygen as required, provided a qualified operator is present. Call a physician. Do not give drugs from adrenaline-ephedrine group.
- Skin contact** : After contact with skin, wash immediately with plenty of water. If there is evidence of frostbite, bathe (do not rub) with lukewarm (not hot) water. If water is not available, cover with a clean, soft cloth or similar covering. If symptoms persist, call a physician.
- Eye contact** : Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. In case of frostbite water should be lukewarm, not hot. If symptoms persist, call a physician.
- Ingestion** : Unlikely route of exposure. As this product is a gas, refer to the inhalation section. Do not induce vomiting without medical advice. Call a physician immediately.

Notes to physician

- Treatment** : Because of the possible disturbances of cardiac rhythm, catecholamine drugs, such as epinephrine, should be used with special caution and only in situations of emergency life support. Treatment of overexposure should be directed at the control of symptoms and the clinical conditions. Treat frost-bitten areas as needed.

SECTION 5. FIREFIGHTING MEASURES

- Suitable extinguishing media** : The product is not flammable.
Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.
Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
- Specific hazards during** : Contents under pressure.

firefighting

This product is not flammable at ambient temperatures and atmospheric pressure.
 However, this material can ignite when mixed with air under pressure and exposed to strong ignition sources.
 Container may rupture on heating.
 Cool closed containers exposed to fire with water spray.
 Do not allow run-off from fire fighting to enter drains or water courses.
 Vapours are heavier than air and can cause suffocation by reducing oxygen available for breathing.
 In case of fire hazardous decomposition products may be produced such as:
 Hydrogen halides
 Hydrogen fluoride
 Carbon monoxide
 Carbon dioxide (CO₂)
 Carbonyl halides

Special protective equipment for firefighters

: In the event of fire and/or explosion do not breathe fumes.
 Wear self-contained breathing apparatus and protective suit.
 No unprotected exposed skin areas.

SECTION 6. ACCIDENTAL RELEASE MEASURES**Personal precautions**

: Immediately evacuate personnel to safe areas.
 Keep people away from and upwind of spill/leak.
 Wear personal protective equipment. Unprotected persons must be kept away.
 Remove all sources of ignition.
 Avoid skin contact with leaking liquid (danger of frostbite).
 Ventilate the area.
 After release, disperses into the air.
 Vapours are heavier than air and can cause suffocation by reducing oxygen available for breathing.
 Avoid accumulation of vapours in low areas.
 Unprotected personnel should not return until air has been tested and determined safe.
 Ensure that the oxygen content is $\geq 19.5\%$.

Environmental precautions

: Prevent further leakage or spillage if safe to do so.
 The product evaporates readily.

Methods for cleaning up : Ventilate the area.

SECTION 7. HANDLING AND STORAGE**Handling**

Handling : Handle with care.
Avoid inhalation of vapour or mist.
Do not get in eyes, on skin, or on clothing.
Wear personal protective equipment.
Use only in well-ventilated areas.
Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50 °C.
Follow all standard safety precautions for handling and use of compressed gas cylinders.
Use authorized cylinders only.
Protect cylinders from physical damage.
Do not puncture or drop cylinders, expose them to open flame or excessive heat.
Do not pierce or burn, even after use. Do not spray on a naked flame or any incandescent material.
Do not remove screw cap until immediately ready for use.
Always replace cap after use.

Advice on protection against fire and explosion : The product is not flammable.
Can form a combustible mixture with air at pressures above atmospheric pressure.

Storage

Requirements for storage areas and containers : Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50 °C. Do not pierce or burn, even after use.
Keep containers tightly closed in a dry, cool and well-ventilated place.
Storage rooms must be properly ventilated.
Ensure adequate ventilation, especially in confined areas.
Protect cylinders from physical damage.

- Respiratory protection** : In case of insufficient ventilation, wear suitable respiratory equipment.
Wear a positive-pressure supplied-air respirator.
Vapours are heavier than air and can cause suffocation by reducing oxygen available for breathing.
For rescue and maintenance work in storage tanks use self-contained breathing apparatus.
- Hygiene measures** : Handle in accordance with good industrial hygiene and safety practice.
Ensure adequate ventilation, especially in confined areas.
Avoid contact with skin, eyes and clothing.
Remove and wash contaminated clothing before re-use.
